REASONS FOR ALLOWANCE

1. The following is an Examiner's statement of reasons for allowance:

The claimed invention shows novelty in the provision the use and transmission of a link training sequence for correcting link errors between two end point ports by the combination of claimed method features including locking of the communication link between two end point ports, transmission of link training sequence(s) to a destination end point port, synchronizing transmission between the end point ports for accurate transfer of the training sequence itself, performing handshaking operations between the two end point ports, and implementing corrective actions based on the training sequence on the communication link. These features are persuasively argued by Applicant in Pages 10-12 of the Response, received 8/17/2004, and are supported by the specification, inter alia, at Pages 45-47, and Figures 27, 66, and 67.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Specification and Drawings

2. The specification is object to for the following reasons:

- a. Figures 11 and 12 require modification of the text present in the figures to properly recite the intended subject matter in its entirety, and reference other Figures present in the application.
- b. Figures 55-61 lack description in the "Brief Description of the Drawings" in the specification.
- c. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. The following title is suggested: "A method for training a communication link between ports to correct for errors".

Art Unit: 2144

Conclusion

3. This application is in condition for allowance except for the above formal matters.
4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
5. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213. A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc D. Thompson whose telephone number is 571-272-3932. The examiner can normally be reached on Monday-Friday, 9am-4pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, William Cuchlinski, Jr. can be reached at 571-272-3925. The fax phone number for the organization where this application or proceeding is assigned remains 703-872-9306.
7. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
